

1. Record Nr.	UNINA9910437769103321
Titolo	Advances in Computational Science, Engineering and Information Technology : Proceedings of the Third International Conference on Computational Science, Engineering and Information Technology (CCSEIT-2013), KTO Karatay University, June 7-9, 2013, Konya, Turkey - Volume 1 // edited by Dhinaharan Nagamalai, Ashok Kumar, Annamalai Annamalai
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2013
ISBN	9783319009513 3319009516
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (xix, 326 pages) : illustrations (some color)
Collana	Advances in Intelligent Systems and Computing, , 2194-5365 ; ; 225
Altri autori (Persone)	NagamalaiDhinaharan KumarAshok AnnamalaiAnnamalai
Disciplina	004 004.07
Soggetti	Computational intelligence Data structures (Computer science) Information theory Dynamics Nonlinear theories Application software Computational Intelligence Data Structures and Information Theory Applied Dynamical Systems Computer and Information Systems Applications
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"ISSN: 2194-5357."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Algorithms, Data structures and Applications -- Wireless and Mobile Networks -- Computer Networks and Communications -- Natural Language Processing an Information Theory -- Cryptography and Information Security.

Sommario/riassunto

This book is the proceedings of Third International Conference on Computational Science, Engineering and Information Technology (CCSEIT-2013) that was held in Konya, Turkey, on June 7-9. CCSEIT-2013 provided an excellent international forum for sharing knowledge and results in theory, methodology and applications of computational science, engineering and information technology. This book contains research results, projects, survey work and industrial experiences representing significant advances in the field. The different contributions collected in this book cover five main areas: algorithms, data structures and applications; wireless and mobile networks; computer networks and communications; natural language processing and information theory; cryptography and information security. .
