

1. Record Nr.	UNINA9910453869803321
Autore	Miller David <1946->
Titolo	Market, state, and community [[electronic resource]] : theoretical foundations of market socialism / / David Miller
Pubbl/distr/stampa	Oxford, England, : Clarendon Press Oxford ; ; New York, : Oxford University Press, c1989
ISBN	9786611981181 1-281-98118-4
Descrizione fisica	1 online resource (372 p.)
Disciplina	330.12/6
Soggetti	Mixed economy Socialism Libertarianism Democracy Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.

2. Record Nr.	UNINA9910437780503321
Autore	Campbell C. J
Titolo	Campbell's atlas of oil and gas depletion / / C.J. Campbell ; foreword by Alexander Wostmann
Pubbl/distr/stampa	New York, : Springer, 2013
ISBN	1-283-94582-7 1-4614-3576-5
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (371 p.)
Disciplina	333.82311
Soggetti	Petroleum industry and trade Petroleum reserves Petroleum industry and trade - Forecasting Petroleum reserves - Forecasting
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	pt. 1. Introduction, reporting, and methodology -- pt. 2. Africa -- pt. 3. Asia-Pacific -- pt. 4. Eurasia -- pt. 5. Europe -- pt. 6. Latin America -- pt. 7. Middle East -- pt. 8. North America -- pt. 9. Global analysis and perspective.
Sommario/riassunto	Campbell's Atlas of Oil and Gas Depletion, Second Edition, is the product of a half-century of critical analysis and updating of data on the status of oil and gas depletion by country, region and the world as a whole. Separate analyses of conventional and non-conventional oil and gas, which are depleting at different rates and costs, show when these critical energy sources peak and decline. The Atlas also summarizes the history and political circumstances of each country to assess the impact on oil and gas production and reserves. It contrasts the First Half of the Oil Age, which saw the rapid expansion of the world economy, allowing the population to grow six-fold, with the Second Half, which will witness a general contraction as these easy, high-density energy supplies dwindle. The transition threatens to be a time of great economic, financial and political tensions. The Atlas, which has been compiled and updated by prominent geologist, former oil company executive, and oil analyst Colin Campbell since the 1960s,

addresses the need for a reliable and comprehensive database on a subject essential to governments, industry, academia, and the population as a whole as we attempt to adapt to these critically changing circumstances. Provides a country-by-country assessment of oil and gas depletion Covers both conventional and non-conventional oil and gas resources Quantifies oil and gas reserves by region Combines a local and a global perspective Represents essential reading for researchers, policy-makers, and industry professionals, with unprecedented implications for the population as a whole.
