

1. Record Nr.	UNINA9910437793203321
Titolo	The soils of Italy // Edoardo A.C. Costantini, Carmelo Dazzi, editors
Pubbl/distr/stampa	New York, : Springer, 2013
ISBN	94-007-5642-9
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (359 p.)
Collana	World soils book series
Altri autori (Persone)	CostantiniEdoardo A. C DazziCarmelo
Disciplina	577.570945
Soggetti	Environmental sciences Soils - Italy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Introduction -- Research in pedology: an historical perspective -- Climate -- Geology and geomorphology -- Vegetation and land use. - Time as a soil-forming factor in Italy -- Pedodiversity -- Soil function and ecological services -- Soil threats -- Soil management -- Soils, humans and industry -- Future soil issues.
Sommario/riassunto	The Soils of Italy is the first comprehensive book on Italian pedology in seventy years. Taking advantage of the authors' large experience and of the most up-to-date information and technology, this book treats the main soil types of Italy, their diffusion, their functions, ecological use, and the threats to which they are subjected during centuries of intensive management. It also deals with future scenarios of the relationships between soil science and other disciplines, such as urban development, medicine, economics, sociology, and archaeology. The description of the soils is accompanied by a complete set of data, pictures and maps, including benchmark profiles. Factors of soil formation are also treated, making use of new, unpublished data and elaborations. The book also includes a history of pedological research in Italy, spanning over a century. .
