Titolo	Linguistic change under contact conditions [[electronic resource] /] / edited by Jacek Fisiak
Pubbl/distr/stampa	Berlin ; ; New York, : M. de Gruyter, 1995
ISBN	3-11-088517-4
Edizione	[Reprint 2010]
Descrizione fisica	1 online resource (452 p.)
Collana	Trends in Linguistics. Studies and Monographs [TiLSM] ; ; 81
Classificazione	ES 425
Altri autori (Persone)	FisiakJacek
Disciplina	417/.2
Soggetti	Languages in contact Linguistic change
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Front matter -- Tadpoles, cuckoos, and multiple births: Language contact and models of change / Aitchison, Jean -- Language contact leading to language change: The case of Northern Norway / Bull, Tove -- Middle English is a creole and its opposite: On the value of plausible speculation / Dalton-Puffer, Christiane -- On the origin of Middle and Modern English / Lüdtke, Helmut -- Notes on the history of word-final /g/ in English / Danchev, Andrei -- Anglo-French and Medieval English scribal practice: The case of Middle English <-ed, -et> and <-id, -it> for common <-ep, -eth> / Diensberg, Bernhard -- Through the looking-glass: Stress rules in collision / Gasiorowski, Piotr -- An assessment of language contact in the development of Irish English / Hickey, Raymond -- Language contact in China: Is Mandarin Chinese derived from a pidgin? / Li, Charles N. -- Glottochronology and the method of comparing the vocabulary in parallel texts / Maczak, Witold -- On the growing role of semantic and pragmatic features in Middle English / Markus, Manfred -- On the impact of language contact on inflectional systems: The reduction of verb inflection in American in Dutch and American Frisian / Marle, Jaap van / Smits, Caroline -- The English double modals: Internal or external change? / Nagle, Stephen J. -- Contact, social variants, parameter setting, and pragmatic function: An example from the history of French syntax / Posner, Rebecca -- Black-White language contact through the centuries: Diachronic aspects of linguistic convergence or divergence in the United States of

America / Schneider, Edgar W. -- Lexico-syntactic modeling across the bilingual continuum / Silva-Corvalán, Carmen -- Agreement between past participle and direct object in Catalan: The hypothesis of Castilian influence revisited / Smith, John Charles -- Linguistic contacts across the English Channel: The case of the Breton retroflex <r> / Tristram, Hildegard L. C. -- Verbal -s inflection in "early" American Black English / Viereck, Wolfgang -- Kent and the Low Countries revisited / Voss, Manfred -- Middle English {-ende} and {-ing}: A possible route to grammaticalisation / Wright, Laura -- Language contact and syntactic change: Some formal linguistic diagnostics / Wurff, Wim van der -- Index of subjects -- Index of languages and dialects -- Index of names

Nota di contenuto	Recent Advances in Elastomers: Their blends, interpenetrating networks -- General Purpose Elastomers -- Special Purpose Elastomers -- Compounding and Vulcanisation -- Processing of Elastomers -- Rubber/Rubber Blends -- Rubber/thermoplastic Blends -- Rubber/thermoset blends -- Interphase modification and Compatibilisation of rubber based blends -- Elastomer based IPNs -- Mico and Nanofillers in rubber based blends.

## Sommario/riassunto

This is a two volume work which summarizes in an edited format and in a fairly comprehensive manner many of the recent technical research accomplishments in the area of elastomers. Elastomers having immense structural possibilities for chemical and mechanical modifications to generate novel properties, functions and applications especially in tire and engineering areas. The books discuss the various attempts reported on solving these problems from the point of view of the chemistry and the structure of elastomers, highlighting the drawbacks and advantages of each method. They summarize the importance of elastomers and their multiphase systems in human life and industry, and covers all the topics related to recent advances in elastomers, their blends, IPNs, composites and nanocomposites. The first volume focuses on advances on the blends and interpenetrating networks (IPNs) of elastomers while the second volume deals with composites and nanocomposites of elastomers.
