

1. Record Nr.	UNINA9910437850603321
Titolo	Interdisciplinary Concepts in Cardiovascular Health : Volume II: Secondary Risk Factors // edited by Ichiro Wakabayashi, Klaus Groschner
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2013
ISBN	3-319-01050-6
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (148 p.)
Disciplina	616.1
Soggetti	Molecular biology Metabolic diseases Health promotion Molecular Medicine Metabolic Diseases Health Promotion and Disease Prevention
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Hypertension and vascular dysfunction -- Obesity and diabetes -- Hyper- and dyslipoproteinemias -- Hyperuricemia -- Proteomics towards biomarkers discovery and risk assessment.
Sommario/riassunto	This book provides an introduction to the principles of both cardiovascular epidemiology and molecular pathophysiology; as a unique aspect, it also outlines and discusses the molecular concepts underlying epidemiological observations. This second volume is focused on all aspects concerning "secondary risk factors" in terms of diseases associated with enhanced risk for cardiovascular events. The book promotes the use of interdisciplinary approaches in the field of preventive medicine based on recent advances in molecular and cellular pathophysiology. The book offers a valuable resource for researchers in basic biomedical fields and clinical scientists alike, as well as guidelines for novel avenues of research in both basic pathophysiology and cardiovascular therapy and prevention.
