

1. Record Nr.	UNINA9910437853503321
Autore	Saakov Vladimir S
Titolo	Derivative spectrophotometry and electron spin resonance (ESR) spectroscopy for ecological and biological questions // Vladimir S. Saakov ... [et al.]
Pubbl/distr/stampa	New York, : Springer, 2013
ISBN	1-283-91184-1 3-7091-1007-6
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (372 p.)
Disciplina	538.364 543.55
Soggetti	Spectrophotometry Electron paramagnetic resonance spectroscopy Ecology Biology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preface -- Introduction -- Chapter 1. Bases of the derivative spectrophotometry.- Chapter 2. The derivative spectrophotometry method for analysis of biologically active substances.- Chapter 3. Applicability of the DSHO method in the work with pigments of plants and animals -- Chapter 4. EPR spectroscopy for solution of some scientific real-world problems in biology, medicine and ecology -- Conclusion -- References -- Subject -- Index. .
Sommario/riassunto	This book provides a multidisciplinary overview to the application of high order derivative spectrophotometry and Electron Spin Resonance (ESR) spectroscopy in biology and ecology. The characteristics of the principle methods as well as the generation of reliable spectra are discussed in general terms allowing the reader to gain an idea of these methods' potentials. Furthermore the authors give an extended overview to the spectroscopic and spectro-photometric analysis of specific biological materials. This volume is a well condensed description of an analytical method and a clear review to its application in biology and related fields and an essential tool for researchers who

are new in the field of spectroscopic methods and their applications in the life sciences.
