

1. Record Nr.	UNINA9910437879303321
Autore	Obukhovskii Valeri
Titolo	Method of Guiding Functions in Problems of Nonlinear Analysis // by Valeri Obukhovskii, Pietro Zecca, Nguyen Van Loi, Sergei Kornev
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2013
ISBN	3-642-37070-5
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (XIII, 177 p.)
Collana	Lecture Notes in Mathematics, , 0075-8434 ; ; 2076
Disciplina	530.15
Soggetti	Mathematics Operator theory Game theory System theory Mathematics, general Operator Theory Game Theory, Economics, Social and Behav. Sciences Systems Theory, Control
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	1 Background -- 2 MGF in Finite-Dimensional Spaces -- 3 Guiding Functions in Hilbert Spaces.- 4 Second-Order Differential Inclusions.- 5 Nonlinear Fredholm Inclusions.
Sommario/riassunto	This book offers a self-contained introduction to the theory of guiding functions methods, which can be used to study the existence of periodic solutions and their bifurcations in ordinary differential equations, differential inclusions and in control theory. It starts with the basic concepts of nonlinear and multivalued analysis, describes the classical aspects of the method of guiding functions, and then presents recent findings only available in the research literature. It describes essential applications in control theory, the theory of bifurcations, and physics, making it a valuable resource not only for "pure" mathematicians, but also for students and researchers working in applied mathematics, the engineering sciences and physics.
