

1. Record Nr.	UNINA9910437888303321
Titolo	IT Convergence and Security 2012 // Kuinam J. Kim. Kyung-Yong Chung, editors
Pubbl/distr/stampa	Dordrecht, : Springer, 2013
ISBN	1-283-93627-5 94-007-5860-X
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (1176 p.)
Collana	Lecture notes in electrical engineering, , 1876-1100 ; ; v. 215
Altri autori (Persone)	KimKuinam J ChungKyung-Yong
Disciplina	005.8
Soggetti	Information technology - Security measures Computer networks - Security measures Computer security
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	pt. 1. Security fundamentals -- pt. 2. Industrial and business information security -- pt. 3. Security protocols and applications -- pt. 4. Convergence security -- pt. 5. IT convergence applications -- pt. 6. Mobile computing and future networks -- pt. 7. Multimedia and information visualization -- pt. 8. Convergence data mining and artificial intelligence -- pt. 9. Web technology and software engineering -- pt. 10. Green convergence services.
Sommario/riassunto	The proceedings approaches the subject matter with problems in technical convergence and convergences of security technology. This approach is new because we look at new issues that arise from techniques converging. The general scope of the proceedings content is convergence security and the latest information technology. The intended readership are societies, enterprises, and research institutes, and intended content level is mid- to highly educated personals. The most important features and benefits of the proceedings are the introduction of the most recent information technology and its related ideas, applications and problems related to technology convergence, and its case studies and finally an introduction of converging existing security techniques through convergence security. Overall, through the

proceedings, authors will be able to understand the most state of the art information strategies and technologies of convergence security.
