Sommario/riassunto	On Human Bondage - a critical reexamination of Orlando Patterson's groundbreaking Slavery and Social Death - assesses how his theories have stood the test of time and applies them to new case studies.

Discusses the novel ideas of social death and natal alienation, as Patterson first presented them 35 years ago and as they are understood today. Brings together exciting new work by a group of esteemed historians of slavery, as well as a final chapter by Patterson himself that responds to and expands upon the other contributions. Provides insights into slave societies around the world and across time, from classical Greece and Rome to modern Brazil and the Caribbean, and from Han China and pre-colonial South Asia to early modern Europe and the New World. Delves into a wide range of topics, including the reformation of social identity after slavery, the new historicist approach to slavery, rituals of enslavement and servitude, questions of honor and dishonor, and symbolic imagery of slavery

Sommario/riassunto

This book describes a variety of current feedback operational amplifier (CFOA) architectures and their applications in analog signal processing/generation. Coverage includes a comprehensive survey of commercially available, off-the-shelf integrated circuit CFOAs, as well as recent advances made on the design of CFOAs, including design innovations for bipolar and CMOS CFOAs. This book serves as a single-source reference to the topic, as well as a catalog of over 200 application circuits which would be useful not only for students, educators and researchers in apprising them about the recent developments in the area but would also serve as a comprehensive repertoire of useful circuits for practicing engineers who might be interested in choosing an appropriate CFOA-based topology for use in a given application.
