1.	Record Nr.	UNINA9910437922803321
	Titolo	Recommender systems for learning / / Nikos Manouselis ... [et al.]
	Pubbl/distr/stampa	New York, : Springer, c2013
	ISBN	1-283-61174-0 9786613924193 1-4614-4361-X
	Edizione	[1st ed. 2013.]
	Descrizione fisica	1 online resource (84 p.)
	Collana	SpringerBriefs in electrical and computer engineering
	Altri autori (Persone)	ManouselisNikos
	Disciplina	006.33
	Soggetti	Educational technology Recommender systems (Information filtering)
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references.
	Nota di contenuto	Introduction and Background -- TEL as a recommendation context -- Survey and Analysis of TEL Recommender Systems -- Challenges and Outlook.
	Sommario/riassunto	Technology enhanced learning (TEL) aims to design, develop and test sociotechnical innovations that will support and enhance learning practices of both individuals and organisations. It is therefore an application domain that generally covers technologies that support all forms of teaching and learning activities. Since information retrieval (in terms of searching for relevant learning resources to support teachers or learners) is a pivotal activity in TEL, the deployment of recommender systems has attracted increased interest. This brief attempts to provide an introduction to recommender systems for TEL settings, as well as to highlight their particularities compared to recommender systems for other application domains.
