| Autore | Nabhan Gary Paul |
| Titolo | Food, Genes, and Culture : Eating Right for Your Origins / / by Gary Paul Nabhan |
| Pubbl/distr/stampa | Washington, DC : , : Island Press/Center for Resource Economics : , : Imprint : Island Press, , 2013 |
| ISBN | 9781610914932 1610914937 |
| Edizione | [1st ed. 2013.] |
| Descrizione fisica | 1 online resource (249 p.) |
| Classificazione | HEA017000SCI029000SOC055000SOC057000SOC002010 |
| Disciplina | 612.3 |
| Soggetti | Ecology Agriculture Environmental Sciences |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | Foreword -- Introduction -- 1. Discerning the Histories Encoded in Our Bodies -- 2. Searching for the Ancestral Diet. Did Mitochondrial Eve and Java Man Feast on the Same Foods? -- 3. Finding a Bean for Your Genes and a Buffer Against Malaria -- 4. The Shaping and Shipping Away of Mediterranean Cuisines -- 5. Discovering Why Some Don't Like It Hot. Is It a Matter of Taste? -- 6. Dealing with Migration Headaches. Should We Change Places, Diets, or Genes? -- 7. Rooting Out the Causes of Disease. Why Diabetes Is So Common Among Desert Dwellers -- 8. Reconnecting the Health of the People with the Health of the Land. How Hawaiians Are Curing Themselves -- Sources -- Index. |
| Sommario/riassunto | Vegan, low fat, low carb, slow carb: Every diet seems to promise a one-size-fits-all solution to health. But they ignore the diversity of human genes and how they interact with what we eat. In Food, Genes, and Culture, renowned ethnobotanist Gary Nabhan shows why the perfect diet for one person could be disastrous for another. If your ancestors were herders in Northern Europe, milk might well provide you with important nutrients, whereas if you're Native American, you have a higher likelihood of lactose intolerance. If your roots lie in the Greek islands, the acclaimed Mediterranean diet might save your heart; if not, all that olive oil could just give you stomach cramps. Nabhan traces |

food traditions around the world, from Bali to Mexico, uncovering the links between ancestry and individual responses to food. The implications go well beyond personal taste. Today's widespread mismatch between diet and genes is leading to serious health conditions, including a dramatic growth over the last 50 years in autoimmune and inflammatory diseases. Readers will not only learn why diabetes is running rampant among indigenous peoples and heart disease has risen among those of northern European descent, but may find the path to their own perfect diet.
