

1. Record Nr.	UNINA9910437949403321
Titolo	Geomorphological impacts of extreme weather : case studies from Central and Eastern Europe / / Denes Loczy, editor
Pubbl/distr/stampa	New York, : Springer, 2013
ISBN	94-007-6301-8
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (378 p.)
Collana	Springer Geography
Altri autori (Persone)	LoczyDenes
Disciplina	551.482094
Soggetti	Geomorphology Europe Environmental conditions
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Foreword -- Content -- Contributors list -- Introduction -- Hydrometeorological Background -- Floods -- Landslides -- Other impacts -- Conclusions.
Sommario/riassunto	This book presents new research on the geomorphological impacts of extreme precipitation events. It focuses on the extreme summer floods, which affected Central and Eastern Europe in 2010. Case studies on their consequences, including inundations, urban flooding, soil erosion, river bank retreat, alluvial fan accumulation, evolution of karst depressions, debris flows, landslides and soil saturation are presented for Poland, the Czech Republic, Ukraine, Slovakia, Hungary, Romania, Slovenia, Croatia, Serbia, Bulgaria and Macedonia. This key applied geomorphology book is crucial for anyone interested in these processes and their consequences and also for decision makers who face these catastrophes.
