

1. Record Nr.	UNINA9910437951603321
Autore	Doody J. Patrick
Titolo	Sand dune conservation, management and restoration / / J. Patrick Doody
Pubbl/distr/stampa	New York, : Springer, 2013
ISBN	1-283-63405-8 9786613946508 94-007-4731-4
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (315 p.)
Collana	Coastal research library, , 2211-0577 ; ; v. 4
Disciplina	577.5 577.583
Soggetti	Sand dune conservation Sand dunes Sand dune management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preface -- 1. Introduction -- 2. Human Occupation, Use and Abuse -- 3. Nature Conservation - Policy and Procedures -- 4. Physical States and Values - Beaches/Foredune -- 5. Vegetated States and Values - Inland Dune -- 6. Trends and Trade-offs - Beaches/Foredune -- 7. Trends and Trade-offs - Inland Vegetated Dune -- 8. Alien Plant Invasion -- 9. Management and Restoration - Applying Best Practice -- 10. Integrated Action - Golf Course Management -- 11. Integrated Action - Machair, Human History and Nature Intertwined -- 12. Present Threats and Future Prospects -- Index.
Sommario/riassunto	This book deals with the development of temperate coastal sand dunes and the way these have been influenced by human activity. The different states in which the habitat exists both for the beach/foredune and inland dune are reviewed against the pressures exerted upon them. Options for management are considered and the likely consequences of taking a particular course of action highlighted. These options include traditional approaches to the conservation and management of wildlife and landscapes as well as habitat restoration. The way the value of the areas changes under different management regimes is

considered mainly from an environmental perspective. Consideration is given to new approaches to management and restoration including adopting a more dynamic approach. Audience This book will be of interest to academics, students and professionals concerned with policy formulation and /or actively managing coastal areas.
