

1. Record Nr.	UNINA9910437968203321
Titolo	Applied Issues in Investigative Interviewing, Eyewitness Memory, and Credibility Assessment [[electronic resource] /] / edited by Barry S. Cooper, Dorothee Griesel, Marguerite Ternes
Pubbl/distr/stampa	New York, NY : , : Springer New York : , : Imprint : Springer, , 2013
ISBN	1461455462 1-299-33704-X 1-4614-5547-2
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (359 p.)
Disciplina	347.066019
Soggetti	Psychology Criminology Criminal law Law and Psychology Criminology and Criminal Justice, general Criminal Law and Criminal Procedure Law
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The challenge for forensic memory research: Methodolotry -- Credibility assessment, common law trials, and fuzzy logic -- The investigation and investigative interviewing of benefit fraud suspects in the UK: Historical and contemporary perspectives -- The sins of interviewing: Errors made by investigative interviewers and suggestions for redress -- Biopsychosocial perspectives on memory variability in eyewitnesses -- Children's memory in "scientific case studies" of child sexual abuse: A review -- Does testimonial inconsistency indicate memory inaccuracy and deception? Beliefs, empirical research, and theory -- Repeated interviews about repeated trauma from the distant past: A study of report consistency -- Discovering deceit: Applying laboratory and field research in the search for truthful and deceptive behaviour -- Is le mot juste? The contextualization of words by expert lie detectors -- Assessment criteria indicative of deception (ACID): An example of the new paradigm of differential recall enhancement -- The

ABC's of CBCA: Verbal credibility assessment in practice -- An "eye" for an "I": The challenges and opportunities for spotting credibility in a digital world.

Sommario/riassunto

Victims. Witnesses. Suspects. Answers to an interviewer's questions may mean the difference between prison or freedom, custody or loss, justice served or justice miscarried—outcomes that depend on expert decision-making as much as on the answers themselves. Meticulously researched and reasoned by an international panel of experts from across the criminal justice fields, *Applied Issues in Investigative Interviewing, Eyewitness Memory, and Credibility Assessment* illustrates areas and strategies for improvement in this complex legal arena. The book begins by arguing for the need for field research in studying eyewitness memory, and subsequent chapters bear this out ably in issues such as biopsychosocial phenomena of memory, why inconsistent testimony may not necessarily equal deceit, and the challenges and opportunities digital technology poses in evaluating truthfulness. Throughout, the book's theories, critiques, models, and tools are informed not only by the behavioral sciences but by the real-world experience of law enforcement and judicial professionals. Among the topics covered:

- Credibility assessment, common law trials, and fuzzy logic.
- Errors made by investigative interviewers and suggestions for redress.
- Children's memory in "scientific case studies" of child sexual abuse.
- Repeated interviews about repeated trauma from the distant past.
- The contextualization of words by expert lie detectors.

Applied Issues in Investigative Interviewing, Eyewitness Memory, and Credibility Assessment will find an interested audience among investigative interviewers, law enforcement professionals, clinical and forensic psychologists, lawyers, and judges looking to integrate more substantial psychological knowledge into this critical area of legal practice.
