Sommario/riassunto	The Techniques in Interventional Radiology series of handbooks describes in detail the various interventional radiology procedures and therapies that are in current practice. The series comprises a number of titles, which cover procedures in angioplasty and stenting, transcatheter embolization and therapy, biopsy and drainage, ablation, pediatric interventional radiology and neurointerventional radiology. Each book is laid out in bullet point format, so that the desired information can be located quickly and easily. Interventional radiologists at all stages, from trainees through to specialists, will find this book a valuable asset for their practice. Interventional Radiology Techniques in Ablation is a practical and concise guide to contemporary techniques in image-guided tumor ablation. This handbook is intended to serve as a quick reference for physicians in interventional radiology training as well as a resource for IR technologists, nurses, nurse practitioners and physician assistants.
