

1. Record Nr.	UNISA996385332103316
Autore	Blake Thomas <1597?-1657.>
Titolo	Infants baptism, freed from antichristianisme [[electronic resource]] : in a full repulse given to Mr. Ch. Blackwood, in his assault of that part of Christs possession, which he holds in his heritage of infants (intituled by him), The storming of Antichrist : digested into three parts ... / / by Tho. Blake .
Pubbl/distr/stampa	London, : Printed by R.W. for Thomas Vnderhill ..., 1645
Descrizione fisica	[8], 130 p
Soggetti	Infant baptism
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Errata: p. [8]. Reproduction of original in Thomason Collection, British Library.
Sommario/riassunto	eebo-0158

2. Record Nr.	UNINA9910437987703321
Titolo	Parasitic diseases of the lungs / / Roberto Barrios, Abida K. Haque, editors
Pubbl/distr/stampa	New York, : Springer, 2013
ISBN	3-642-37609-6
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (114 p.)
Altri autori (Persone)	AngelelliRoberto Barrios HaqueAbida K
Disciplina	610 616.07 616.2 616.24
Soggetti	Lungs - Infections Parasitic diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Diagnosis of Pulmonary Parasitic Diseases -- Molecular Pathology of Pulmonary Parasitic Diseases -- General Mechanisms of Tissue Injury in Parasitic Infections -- Protozoal Infections -- Nematoda -- The Trematodes -- Cestoda -- Interpretation of Lung Biopsies with Parasitic vs. Pseudoparasitic Structures: Artifacts that Resemble Parasites and Parasites that Resemble Artifacts -- Arthropods and Bronchopulmonary Pathology.
Sommario/riassunto	Most parasitic diseases occur in tropical and subtropical regions, but some, such as toxoplasmosis and cryptosporidiosis, are endemic or rapidly emerging elsewhere, including the United States and Europe. Diagnosis is often difficult as the clinical manifestations of many parasitic lung diseases are similar to those of common respiratory illnesses and routine tests can fail to detect the infections. The relative rarity of these diseases increases the challenges faced by clinicians and pathologists. Parasitic Diseases of the Lungs is designed as a practical guide for pathologists who encounter parasitic diseases of the lung in their daily routine. The book comprises eight chapters. After discussion of the handling of lung biopsies from patients with suspected parasitic

disease, individual chapters focus on Protozoa, Nematoda, Trematoda, and Cestoda. The morphologic patterns associated with various parasitic infections are then analyzed, and differentiation between artifacts and parasites is discussed. The final chapter is devoted to the immunocompromised patient and covers general principles of histologic evaluation, parasites associated with HIV and AIDS, and the features of diffuse alveolar damage.
