UNINA9910437988503321 Inflammatory Breast Cancer [[electronic resource] /] / edited by Jaime G. **Titolo** de la Garza-Salazar, Abelardo Meneses-Garcia, Claudia Arce-Salinas Pubbl/distr/stampa London:,: Springer London:,: Imprint: Springer,, 2013 **ISBN** 1-283-69689-4 0-85729-991-3 Edizione [1st ed. 2013.] Descrizione fisica 1 online resource (155 p.) 616.99/449 Disciplina 616.99449 Soggetti Oncology Medicine Oncology Biomedicine, general Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Description based upon print version of record. Note generali Includes bibliographical references and index. Nota di bibliografia Nota di contenuto 1. Introduction -- 2. Breast Cancer: Epidemiological Panorama and Opportunities for Prevention -- 3. Pathology of Inflammatory Breast Cancer -- 4. Inflammatory Breast Cancer. Clinical Presentation, Diagnosis, Staging Evaluation, Differential Diagnosis, Surgical Treatment, and Follow-up -- 5. Imaging -- 6. Chemotherapy -- 7. Radiotherapy in Inflammatory Breast Cancer -- 8. Recurrent Inflammatory Breast Carcinoma: Prevalence, Patterns of Recurrence, and Therapeutic Approach -- 9. The Molecular Biology of Inflammatory Breast Cancer -- 10. Target Therapy in Inflammatory Breast Cancer --11. Follow-Up In Inflammatory Breast Cancer. Inflammatory breast cancer is a rare and aggressive form of breast Sommario/riassunto cancer that occurs in women of all ages, and, rarely, in men. Variable disease presentation means that this disease is often undetected and patients with this diagnosis have a poor prognosis. Inflammatory Breast Cancer brings together the existing clinical information on inflammatory breast cancer. The content covers epidemiology, risk factors, diagnosis, histopathology and staging, therapy and management of patients with this disease. Recent advances in therapy

have improved the prognosis of this type of cancer considerably, making this text a timely addition to the literature. This book is an essential tool for medical, surgical and clinical oncologists specialising in breast cancer, who will inevitably encounter this rare but pernicious disease.
