Sommario/riassunto	More than five decades have passed since Jane Jacobs wrote her classic The Death and Life of Great American Cities, and since a front page headline in the New York Times read, ""Cars Choking Cities as 'Urban Sprawl' Takes Over."" Yet sprawl persists, and not by mistake. It happens for a reason. As an activist and a scholar, Benjamin Ross is

uniquely placed to diagnose why this is so. Dead End traces how the ideal of a safe, green, orderly retreat where hardworking members of the middle class could raise their children away from the city mutated into the McMansion and strip mall-ridden suburbs

Nota di contenuto	Foreword, P. Asherson -- Foreword, A. Paternotte -- Preface -- Introduction -- Diagnostic assessment -- Diagnostic instruments -- Treatment -- Treatment: coaching adults with ADHD -- Set-up and organisation of a specialist department -- Appendix -- References -- Index -- About the author.
Sommario/riassunto	Adult ADHD: Diagnostic Assessment and Treatment, Third Edition covers not only diagnostic assessment, but also comorbidity patterns as well as differential diagnosis of ADHD with for example bipolar disorder and borderline personality disorder. The symptom overlap and misdiagnosis of chronic fatigue syndrome in girls and women with the inattentive subtype of ADHD, ADD is explored. The chronic delayed sleep phase syndrome associated with ADHD based on disturbances in the circadian rhythm, and the possible consequences for general health (obesity, diabetes, cardiovascular diseases and cancer) are discussed. There are sections on ADHD and intelligence, criminality, sexuality, dyslexia and autism. Adult ADHD can be treated effectively but as yet

the disorder is not always recognised by professionals and this book aims to help correct this. Diagnostic tools are included, such as the structured Diagnostic Interview for Adult ADHD (DIVA), and an ultra-short and somewhat longer screening tool, all based on the DSM-IV criteria for ADHD. Treatment options cover psychoeducation and motivation and individual and group coaching; long-acting stimulants and other new drugs for treating ADHD; use of melatonin to treat the delayed sleep-phase disorder. Useful information is included on the setting up and organisation of a department for adult ADHD with a multidisciplinary team. References, websites and useful international addresses have all been updated. Adult ADHD: Diagnostic Assessment and Treatment, Third Edition is intended for students, junior doctors/residents, psychologists, psychiatrists, other mental healthcare professionals and interested parties and provides a quick overview of the current state of the science and of the methods used in diagnosis and treatment. Adult ADHD: Diagnostic Assessment and Treatment, Third Edition was originally published by Pearson Assessment and Information BV, The Netherlands.
