

1. Record Nr.	UNINA9910437990603321
Titolo	Atlas of Anatomic Pathology with Imaging : A Correlative Diagnostic Companion // edited by Gerhard R F Krueger, L Maximilian Buja
Pubbl/distr/stampa	London : , : Springer London : , : Imprint : Springer, , 2013
ISBN	1-4471-2846-X
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (827 p.)
Altri autori (Persone)	KruegerG. R. F BujaL. Maximilian
Disciplina	616.07/57
Soggetti	Anatomy Pathology Radiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Cardiovascular Pathology -- Pathology of the Respiratory Tract -- Pathology of the Gastrointestinal Tract -- Pathology of the Liver, Biliary System, and Exocrine Pancreas -- Pathology of the Urinary System and the Male Genital Tract -- Pathology of the Breast and Female Genital Tract -- Pathology of Hematopoietic and Lymphatic Tissues -- Pathology of Bones and Soft Tissues -- Pathology of Skin and Adnexa -- Endocrine Pathology -- Pathology of the Ear, Nose, and Throat -- Dental and Orofacial Pathology -- Pathology of the Central and Peripheral Nervous System -- Pathology of the Eye.
Sommario/riassunto	Atlas of Anatomic Pathology with Imaging - A Correlative Diagnostic Companion is a valuable teaching tool for medical students and residents in several specialities such as pathology, radiology, internal medicine, surgery and neurologic sciences. Its need is all the more urgent given the severe shortcuts in the teaching of anatomic pathology following the decrease in the number of autopsies performed. Many of the images shown in the atlas would not be available without performing autopsies and therefore this atlas is an essential for all those in the field. Atlas of Anatomic Pathology with Imaging - A Correlative Diagnostic Companion is the first to combine

gross anatomic pictures of diseases with diagnostic imaging. This unique collection of material consisting of over 2000 illustrations complied by experts from around the world is a valuable diagnostic resource for all medical professionals.
