

1. Record Nr.	UNINA9910438004503321
Titolo	Atlas of genitourinary oncological imaging / / Ariadne M Bach, Jingbo Zhang, editors
Pubbl/distr/stampa	New York, : Springer, c2013
ISBN	1-4614-4872-7
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (353 p.)
Collana	Atlas of oncology imaging ; ; 1
Altri autori (Persone)	BachAriadne M ZhangJingbo
Disciplina	616.99/46
Soggetti	Genitourinary organs - Cancer - Imaging Cancer - Imaging
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Renal Parenchymal Tumor Imaging -- Upper Tract Oncologic Imaging -- Bladder Cancer Imaging -- Prostate Cancer Imaging -- Imaging of Adrenal Neoplasms -- Testicular Cancer Imaging -- General Chemotherapy Imaging -- Genitourinary Interventions -- Nuclear Medicine Imaging in Genitourinary Oncology -- Pediatric Genitourinary Tumor Imaging.
Sommario/riassunto	The Atlas of Genitourinary Oncological Imaging presents a comprehensive visual review of appearances for normal anatomy and oncological diseases in the genitourinary system using over 900 radiological images and illustrations. The book presents current imaging techniques and discusses the role of imaging in pre-treatment staging and post-treatment follow-up. Diseases discussed include kidney, adrenal gland, upper tract, bladder, prostate, testes, and pediatric malignancies. Individual chapters include normal anatomy, imaging techniques, and pathology of each cancer type. The staging of the malignancy and what to include in the radiology report are discussed, and expected and complicated postoperative and post-treatment findings and recurrence are presented. Dedicated chapters on interventional and radiation therapy discuss their unique role in the management and treatment of oncology of the genitourinary system. Additionally, a chapter on chemotherapy toxicities discusses drug reaction treatment therapies unique to the genitourinary system.

Edited and written by radiologists from the genitourinary disease management team at Memorial Sloan-Kettering Cancer Center, the Atlas of Genitourinary Oncological Imaging is an ideal resource for radiology and urology trainees seeking a review of the basics and for practicing radiologists looking for answers to challenging cases confronted in daily practice.
