

1. Record Nr.	UNINA9910438012903321
Titolo	Innovation with information technologies in healthcare / / Lyle Berkowitz, Chris McCarthy, editors
Pubbl/distr/stampa	London ; ; New York, : Springer, 2013
ISBN	9781447143277 1-283-84875-9 1-4471-4327-2
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (311 p.)
Collana	Health Informatics, , 1431-1917
Altri autori (Persone)	BerkowitzLyle McCarthyChris
Disciplina	610.28
Soggetti	Medical care - Data processing Information technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Foreword -- Preface -- The Healing Edge -- Mad for Method -- You Have an EHR. Now What -- The Inflection Navigator -- Making "Right" Easier -- Prevention Every Time -- Logic Rules! -- "All or None" Bundle Philosophy -- Automatically Getting Better -- Meet You at 01100101 -- The Connected Patient -- The Virtual Consult -- TeleVisits Keeps IT Local -- Mommy Monitor -- Every Language Now -- Rise of the ePharmacists -- On the Edge of Edge -- The Smartest Room -- One EMR To Go Please -- Real-Time, Right Care -- Dashboards 2.0 -- The Patient Voice Amplified -- The Gaming Edge -- Appendix A: Meet the Martinez Family -- Appendix B: Innovation Glossary -- Appendix C: Reading for Inspiration -- Appendix D: Meet the Authors and Their Organizations.
Sommario/riassunto	Huge amounts of money are spent on electronic health record (EHR) and other healthcare information technology (HIT) systems each year, and the challenge is to ensure these systems are effective on every level. Simply recreating paper-based processes on these systems does not significantly improve quality, efficiency or the financial aspects of setting up these services. While there are excellent resources available on healthcare IT and others that detail innovation strategies in

healthcare, there is little material providing real life examples and explanations of how to combine these two powerful tools. Innovation with Information Technologies in Healthcare thus serves to fill this gap by using real life cases to detail how information technology systems have been used in an innovative fashion to solve the types of problems faced every day in healthcare. The Editors and their carefully selected group of contributors, ranging from multi-hospital organizations to small clinics, have assembled a book that describes successful cases covering EHR, Telemedicine and other health IT experiences, in which brilliant and innovative uses of healthcare IT have improved quality, efficiency and value. Each case chapter includes a story about the impact of these HIT innovations on patients, an explanation on the origin of the innovation, details on how the innovation evolved from idea to reality, the real world results of the innovation and lessons learned along the way. Additionally, each of these chapters conclude with thoughts on future HIT innovations from each contributor. .
