

1. Record Nr.	UNINA9910438013503321
Titolo	Nuclear medicine technology : review questions for the Board Examinations // Karen Ramer ... [et al.]
Pubbl/distr/stampa	Berlin ; ; New York, : Springer, 2013
ISBN	3-642-38285-1
Edizione	[4th ed.]
Descrizione fisica	1 online resource (287 p.)
Altri autori (Persone)	RamerKaren
Disciplina	616.07548
Soggetti	Nuclear medicine - Examinations Radiologic technologists
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Introduction -- Radioactivity, Radiopharmacy and Quality Assurance -- Radiation Safety -- Instrumentation and Quality Assurance -- Image Presentation and Computers -- Skeletal System Scintigraphy -- Central Nervous System Scintigraphy -- Cardiovascular System Scintigraphy -- Respiratory System Scintigraphy -- Gastrointestinal Tract Scintigraphy -- Genitourinary System Scintigraphy -- Gncologic Scintigraphy -- Infection Scintigraphy -- Endocrine System Scintigraphy -- Non-Imaging Procedures and Radionuclide Therapy -- Patient Care -- Basic PET Principles -- Multi-Modality Imaging.
Sommario/riassunto	This book prepares students and technologists for registry examinations in nuclear medicine technology by providing practice questions and answers with detailed explanations, as well as a mock registry exam. The questions are designed to test the basic knowledge required of nuclear medicine technologists, as well as the practical application of that knowledge. The topics covered closely follow the content specifications and the components of preparedness as published by the certification boards. This 4th edition includes expanded coverage of positron emission tomography and other new procedures and practices in the field of nuclear medicine and molecular imaging.
