

1. Record Nr.	UNINA9910438015003321
Titolo	Target Volume Delineation and Field Setup : A Practical Guide for Conformal and Intensity-Modulated Radiation Therapy // edited by Nancy Y. Lee, Jiade J. Lu
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2013
ISBN	1-283-62698-5 9786613939432 3-642-28860-X
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (309 p.)
Disciplina	616.9940642
Soggetti	Radiotherapy Oncology Radiology Oncology Imaging / Radiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Head and Neck Cancer -- Breast Cancer -- Gastrointestinal Cancer -- Gynecologic Cancer -- Genitourinary Cancer -- CNS -- Lymphoma -- Pediatrics.
Sommario/riassunto	This handbook is designed to enable radiation oncologists to appropriately and confidently delineate tumor volumes/fields for conformal radiation therapy, including intensity-modulated radiation therapy (IMRT), in patients with commonly encountered cancers. The orientation of this handbook is entirely practical, in that the focus is on the illustration of clinical target volume (CTV) delineation for each major malignancy. Each chapter provides guidelines and concise knowledge on CTV selection for a particular disease, explains how the anatomy of lymphatic drainage shapes the selection of the target volume, and presents detailed illustrations of volumes, slice by slice, on planning CT images. While the emphasis is on target volume delineation for three-dimensional conformal therapy and IMRT,

information is also provided on conventional radiation therapy field setup and planning for certain malignancies for which IMRT is not currently suitable.
