

1. Record Nr.	UNINA9910438017703321
Autore	Bonifazi Ernesto
Titolo	Differential Diagnosis in Pediatric Dermatology // by Ernesto Bonifazi
Pubbl/distr/stampa	Milano : , : Springer Milan : , : Imprint : Springer, , 2013
ISBN	88-470-2859-0
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (149 p.)
Disciplina	616.5 618.92/5
Soggetti	Dermatology Pediatrics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Inherited Skin Disorders -- Nevi -- Viral Infections -- Bacterial Infections -- Fungal Infections -- Parasitic Infestations -- Acne -- Allergic Diseases -- Autoimmune Skin Disorders -- Miscellaneous Items -- Connective Tissue Diseases -- Tumors.
Sommario/riassunto	Differential diagnosis in pediatric dermatology requires not only a direct experience in the field, but also an inclination to symptoms observations and analysis. This book, the first exclusively devoted to this topic, covers the full range of relevant conditions: inherited skin disorders; nevi; viral, bacterial, fungal, and parasitic infections; acne; allergic diseases; autoimmune skin disorders; connective tissue diseases; tumors; and miscellaneous conditions. Each chapter addresses the differential diagnosis between two (or occasionally three or four) dermatological conditions. All chapters are just two pages long, containing between two and six images and a very short text emphasizing the clinical differences between the diseases in question. At the end of each chapter, a summary highlights one or two characteristics essential for the differential diagnosis. The volume will represent an ideal tool for pediatric dermatologists, pediatricians, and GPs, and will help them in the diagnostic process.
