Nota di contenuto	Maternal Mortality: The Greatest Health Divide in the World -- Postpartum Hemorrhage in a Conflict Setting -- Obstetric Fistula -- Diagnosis and Treatment of Malaria in Pregnancy -- The Unmet Need for Family Planning -- Anesthesia in Action at a Global Health Site -- At Your Cervix: Preventing Cervical Cancer using a Single Visit Approach -- The Challenge of Global Cervical and Breast Cancer Prevention, Detection, and Treatment -- Radiation Therapy: A Privilege, not a Right -- Treatment of Cervical Cancer with Limited Radiotherapy in Low-Resource Settings -- Interested in Volunteering Abroad? Considerations When Choosing a Global Health Opportunity.
Sommario/riassunto	In the increasingly globalized twenty-first century, cross-cultural communication and knowledge of culturally informed health practices are critical skills for women's health providers. Around the Globe for

Women's Health is a concise, culturally sensitive, and clinically relevant guide that aims to increase health equity through prevention and improved clinical care for women around the world. Case-based chapters highlight clinical issues (such as obstetric fistula, malaria, and postpartum hemorrhage) and barriers to care (the unmet need for family planning, or limited radiotherapy in low-resource countries, for example). Around the Globe for Women's Health is a must-have resource not just for physicians considering working in another country, but all providers seeking to provide better care for diverse populations of women within the United States.
