

1. Record Nr.	UNINA9910438028003321
Titolo	Statistical Models for Proportions and Probabilities // by George A.F. Seber
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2013
ISBN	3-642-39041-2
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (74 p.)
Collana	SpringerBriefs in Statistics, , 2191-5458
Altri autori (Persone)	SeberGeorge A. F
Disciplina	519.5
Soggetti	Statistics Statistical Theory and Methods
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographic references.
Nota di contenuto	1.Single Proportion -- 2.Single Probability -- 3.Several Proportions or Probabilities -- 4.Multivariate Hypothesis Tests -- 5.Logarithmic Models.
Sommario/riassunto	Methods for making inferences from data about one or more probabilities and proportions are a fundamental part of a statistician's toolbox and statistics courses. Unfortunately many of the quick, approximate methods currently taught have recently been found to be inappropriate. This monograph gives an up-to-date review of recent research on the topic and presents both exact methods and helpful approximations. Detailed theory is also presented for the different distributions involved, and can be used in a classroom setting. It will be useful for those teaching statistics at university level and for those involved in statistical consulting.
