1.	Record Nr.	UNINA9910438037803321
	Autore	Marghitu Dan B
	Titolo	Statics with MATLAB / / Dan B. Marghitu, Mihai Dupac, Nels H. Madsen
	Pubbl/distr/stampa	London : , : Springer, , 2013
	ISBN	1-4471-5110-0
	Edizione	[1st ed. 2013.]
	Descrizione fisica	1 online resource (ix, 286 pages) : illustrations (some color)
	Collana	Gale eBooks
	Disciplina	620.103
	Soggetti	Statics - Data processing
		Engineering mathematics - Data processing
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
	Nota di contenuto	1.Operation with Vectors -- 2.Moments, Couples, Equipollent Systems -- 3.Centers of Mass -- 4.Equilibrium -- 5.Friction -- 6.VirtualWork and Stability.
	Sommario/riassunto	Engineering mechanics involves the development of mathematical models of the physical world. Statics addresses the forces acting on and in mechanical objects and systems. Statics with MATLAB® develops an understanding of the mechanical behavior of complex engineering structures and components using MATLAB® to execute numerical calculations and to facilitate analytical calculations. MATLAB® is presented and introduced as a highly convenient tool to solve problems for theory and applications in statics. Included are example problems to demonstrate the MATLAB® syntax and to also introduce specific functions dealing with statics. These explanations are reinforced through figures generated with MATLAB® and the extra material available online which includes the special functions described. This detailed introduction and application of MATLAB® to the field of statics makes Statics with MATLAB® a useful tool for instruction as well as self study, highlighting the use of symbolic MATLAB® for both theory and applications to find analytical and numerical solutions.
