Nota di contenuto	pt. I. Entrepreneurship, venture finance and ethics -- pt. II. The impact of regulation and financial structure on ethics and governance -- pt. III. Ethics, fraud and managerial decisions -- pt. IV. Ethics and governance in China.
Sommario/riassunto	This book spans topics at the intersection of business ethics and governance as they pertain to entrepreneurship and finance. To the Editors' knowledge it is the first collection of papers linking entrepreneurship and finance to governance and business ethics, rather than exploring these issues separately. The chapters identify empirically the strong interplay between ethics in organizational efficiency and financial activity, and the role of legal settings and governance in facilitating better ethical standards. The chapters explore novel and timely topics, particularly in the context of the recent financial crisis and the subsequent debate over regulating unethical behaviour. This book finally encourages future scholars to investigate the role of law and governance in mitigating corruption and fostering integrity in the fields of entrepreneurship and finance.
