Record Nr. UNINA9910438070403321

The 19th International Conference on Industrial Engineering and **Titolo**

Engineering Management / / Ershi Qi, Jiang Shen, Runliang Dou, editors

Pubbl/distr/stampa Heidelberg, Germany, : Springer, c2013

ISBN 3-642-38391-2

Edizione [1st ed. 2013.]

1 online resource (1586 p.) Descrizione fisica

Altri autori (Persone) QiErshi

> ShenJiang **DouRunliang**

Disciplina 670.42

Soggetti Industrial engineering

Engineering - Management

Lingua di pubblicazione Inglese

Formato Materiale a stampa

Livello bibliografico Monografia

Note generali Description based upon print version of record.

Nota di bibliografia Includes bibliographical references at the end of each chapters.

Nota di contenuto Advanced Decision Analysis and Methods -- Operations Research --

Systems Modeling and Simulation -- Workflow Technologies and

Applications.

The International Conference on Industrial Engineering and Engineering Sommario/riassunto

> Management is sponsored by the Chinese Industrial Engineering Institution, CMES, which is the only national-level academic society for Industrial Engineering. The conference is held annually as the major event in this arena. Being the largest and the most authoritative international academic conference held in China, it provides an academic platform for experts and entrepreneurs in the areas of international industrial engineering and management to exchange their research findings. Many experts in various fields from China and around the world gather together at the conference to review, exchange, summarize and promote their achievements in the fields of industrial engineering and engineering management. For example, some experts pay special attention to the current state of the application of related techniques in China as well as their future prospects, such as green product design, quality control and management, supply chain and logistics management to address the

need for, amongst other things low-carbon, energy-saving and

emission-reduction. They also offer opinions on the outlook for the development of related techniques. The proceedings offers impressive methods and concrete applications for experts from colleges and universities, research institutions and enterprises who are engaged in theoretical research into industrial engineering and engineering management and its applications. As all the papers are of great value from both an academic and a practical point of view, they also provide research data for international scholars who are investigating Chinese style enterprises and engineering management.
