

1. Record Nr.	UNINA9910438111903321
Autore	Jenkins Jamey L
Titolo	Observing the Sun [[electronic resource] ] : A Pocket Field Guide // by Jamey L. Jenkins
Pubbl/distr/stampa	New York, NY : , : Springer New York : , : Imprint : Springer, , 2013
ISBN	1-4614-8015-9
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (255 p.)
Collana	Astronomer's Pocket Field Guide, , 2198-0756
Disciplina	523.7
Soggetti	Observations, Astronomical Astronomy—Observations Astronomy Astronomy, Observations and Techniques Popular Science in Astronomy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	The Sun is a Star -- Observe the Sun -- Identify Solar Features -- Record Your Observations.
Sommario/riassunto	A comprehensive solar observing guide for use at the telescope by amateur astronomers at all three levels: beginning, intermediate, and advanced. Users will find invaluable information for identifying features through photos, charts, diagrams in a logical, orderly fashion and then interpreting the observations. Because the Sun is a dynamic celestial body in constant flux, astronomers rarely know for certain what awaits them at the eyepiece. All features of the Sun are transient and sometimes rather fleeting. Given the number of features and the complex life cycles of some solar features, it can be a challenging hobby, and this guide provides all of the guidance necessary to inform observers about the sights and events unfolding before their eyes on the most active and powerful member of our Solar System.
