Descrizione fisica	1 online resource (275 p.)
Disciplina	618.928521
Soggetti	Psychic trauma in children Psychic trauma in adolescence Electronic books.
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.

2. Record Nr.	UNINA9910438130303321
Titolo	Corneal surgery : essential techniques // Bruno Zuberbuhler ... [et. al.]
Pubbl/distr/stampa	New York, : Springer, 2013
ISBN	3-642-12502-6
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (159 p.)
Altri autori (Persone)	ZuberbuhlerBruno TuftStephen GartryDavid SpokesDavid
Disciplina	EB
Soggetti	Cornea - Surgery Eye - Surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Ocular surface and reconstructive surgery -- Corneal Transplantation -- Refractive corneal surgery -- Wet Lab.
Sommario/riassunto	This book is an informative and comprehensive guide to the essential techniques currently employed in corneal surgery. It focuses in particular on two principal areas: the treatment of corneal disorders by means of different forms of corneal transplantation and the use of the Excimer laser to treat refractive disorders. In order to facilitate learning and later deployment of the techniques a multimedia approach is used. Surgical steps are described clearly within the book and can then be observed in detail on the accompanying high-quality DVD. A further feature is the inclusion of a chapter devoted to wet lab training, which presents practical preparatory exercises that can be performed by the surgeon, in some cases at home. This book will be of particular value as a handy reference for ophthalmologists who are just embarking upon their surgical training. However, it will also be informative for trained eye surgeons, who will be able to compare their own practice with the presented procedures and to assimilate the latest techniques.
