Nota di bibliografia Includes bibliographical references. Nota di contenuto -Anesthetic Issues for Orthopedic Surgery in Patients with Rheumatoid Diseases -- Perioperative Pain Management and Orthopedic Surgery --Autologous Blood Transfusion -- Venous Thromboembolism Prophylaxis in the Patient with Rheumatic Diseases Undergoing Orthopedic Surgery -- Preoperative cardiovascular risk assessment --Management of Medications in Patients with Rheumatic Diseases During the Perioperative Period -- Prophylactic Antibiotic Use in Patients with Rheumatic Diseases -- Perioperative Management of Antiphospholipid Antibody Positive Patients During Non-Cardiac Surgeries -- Perioperative Management of Anticoagulation in the Patient with the Antiphospholipid Syndrome in Cardiac Surgery and Cardiac Interventions -- Perioperative Management of the Patient with Immune Thrombocytopenic Purpura de Novo, and the Thrombocytopenia of Antiphospholipid Antibody Syndrome --Perioperative Management of the Patient with Pulmonary Hypertension -- Perioperative Management of the Neutropenic Rheumatologic Patient -- Perioperative Management of the Patient with Chronic Kidney Disease, Hypertension, or End-Stage Renal Disease -- Systemic Lupus Erythematosus -- Scleroderma and Raynaud Phenomenon --

Perioperative Management of the Patient with Idiopathic Inflammatory Myopathy -- Perioperative Management of Patients with Rheumatoid

Arthritis -- Perioperative Management of the Patient with Takayasus Arteritis -- Medical Issues in Osteoporotic Hip Fractures -- Total Joint Arthroplasty in the Patient with Connective Tissue Disease --Postoperative Fever and Infection in Immunosuppressed Patients --Diagnosis and Management of Prosthetic Joint Infection --Perioperative Gout and Pseudogout -- Perioperative Myocardial Infarction -- Cervical Spine Stabilization -- Laminectomy -- Vertebral Augmentation -- Shoulder Arthroplasty - Jason D. Doppelt and Joseph P. Iannotti -- Carpal Tunnel Surgery -- Metacarpophalangeal Arthroplasty -- Total Hip Arthroplasty in Rheumatic Disease and Associated Inflammatory Arthropathies -- Total Knee Arthroplasty in Rheumatoid Disease and Other Associated Inflammatory Arthropathies -- Knee Arthroscopy -- Surgery for Avascular Necrosis of the Femoral Head -- Laparoscopic Splenectomy -- Lung Biopsy -- Renal Transplantation -- Lung Decortication -- Lung Transplantation --Comanagement Models for the Patient with Joint Disease.

## Sommario/riassunto

Perioperative care of the patient with a multisystem inflammatory (rheumatic) disease has become increasingly complex and perioperative medicine has evolved into its own subspecialty. Physicians who have expertise in managing patients with rheumatic disease infrequently spend significant time also managing patients undergoing surgical procedures, and the reverse is equally true. Despite the burgeoning literature on the medical management of the surgical patient, scant data have been generated regarding patients with complex rheumatic disease. Perioperative Management of Patients with Rheumatic Disease fills a conspicuous gap in the literature and aims at providing a paved path for rheumatologists--who infrequently manage surgical problems--and medical consultants--who only seldom encounter patients with rheumatic diseases--to tread as they care for patients in the perioperative period. The book addresses discrete management issues from the perspective of the medical subspecialist and also offers concise descriptions of surgical procedures. Written from the surgical perspective for the internist, the surgical procedure chapters include a brief description of relative contraindications, time to recovery, rehabilitation suggestions, and comments regarding common and severe procedure specific postoperative complications.
