

1. Record Nr.	UNINA9910438140503321
Titolo	Operator theory, pseudo-differential equations, and mathematical physics : the Vladimir Rabinovich anniversary volume // edited by Yuri I. Karlovich ... [et al.]
Pubbl/distr/stampa	Basel, : Birkhauser London, : Springer [distributor], 2013
ISBN	9781283910996 1283910993 9783034805377 3034805373
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (425 p.)
Collana	Operator theory, advances and applications ; ; 228
Altri autori (Persone)	KarlovichYuri I. <1949-> RabinovichVladimir <1940->
Disciplina	515.724
Soggetti	Operator theory Differential equations Mathematical physics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Preface -- Contributions by renowned scientists -- References.
Sommario/riassunto	This volume is a collection of papers devoted to the 70th birthday of Professor Vladimir Rabinovich. The opening article (by Stefan Samko) includes a short biography and the bibliography of Vladimir Rabinovich's works, along with personal recollections. It is followed by twenty research and survey papers in various branches of analysis (pseudodifferential operators and partial differential equations, Toeplitz, Hankel, and convolution type operators, variable Lebesgue spaces, etc.) close to Professor Rabinovich's research interests. Many of them are written by participants of the international workshop "Analysis, Operator Theory, and Mathematical Physics" (Ixtapa, Mexico, January 23–27, 2012), who have a long history of scientific collaboration with Rabinovich and whose contributions are partially based on the talks presented at that meeting. The volume will be of

great interest to researchers and graduate students working in the fields of differential equations, operator theory, functional and harmonic analysis and mathematical physics.
