The European Union's legal order is traditionally seen as largely autonomous within the global legal system. At the same time, the EU is an important player in the global governance network and has revealed its dependence on international law and international normative processes. The strong and explicit link between the EU and a large number of other international organisations raises questions concerning the impact of decisions taken by those organisations and of international agreements concluded with those organisations on the autonomy of the EU legal order. While the relationship between international and EU law as such is a popular academic theme, the increasing influence of norms enacted by international organisations and more loosely structured bodies on the shaping of the EU and its legal order has never before been studied in a similar comprehensive fashion. In this book, prominent academics and leading practitioners explore a wide variety of legal issues pertaining to the influence of the most prominent universal and regional international organisations and bodies on the EU's legal order, its institutional design and operational experiences. As such, this book will be of much value to academics, policy makers, civil servants, lawyers and judges with an interest in the interaction of international law and EU law, as well as the relations between the European Union and other international organisations.

Sommario/riassunto	<p>This Research Topic has the aim to fill the gap of the many unresolved scientific issues on Autism Spectrum Disorders (ASD) that are still in need of investigation. Targeted treatments based on the understanding of the underlying pathogenic mechanisms of disease are still lacking. Further research is awaited and should be obtained through a significant effort on experimental treatment trials and neuroscience research. This Topic is divided in two main sections, one covering clinical issues and another on basic neurosciences of Autism Spectrum Disorders. A more detailed description of the contents of the articles is provided in the editorial at the beginning of the issue.</p>
