

1. Record Nr.	UNINA9910438316003321
Autore	Rajamani Ravi
Titolo	Electric flight technology : the unfolding of a new future // Ravi Rajamani
Pubbl/distr/stampa	Warrendale, Pa. (400 Commonwealth Dr., Wallendale PA USA) : , : Society of Automotive Engineers, , 2018 [Piscataqay, New Jersey] : , : IEEE Xplore, , [2018]
ISBN	0-7680-8470-9
Edizione	[1st ed.]
Descrizione fisica	1 PDF(83 pages)
Collana	Society of Automotive Engineers. Electronic publications.
Disciplina	629
Soggetti	Aeronautics - Technological innovations Electric propulsion
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

Sommario/riassunto	The use of electric propulsion in airplanes is not a new phenomenon. However, it is only recently that it has taken off in a concrete manner with a viable commercial future. This book reviews the history of this field, discusses the key underlying technologies, and describes how the future for these technologies will likely unfold, distinguishing between all-electric (AE) and hybrid-electric (HE) architectures.
