Titolo	Legal Issues for Implementing the Clean Development Mechanism in China // by Xiaoyi Jiang
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2013
ISBN	1-283-61224-0 9786613924698 3-642-24737-7
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (282 p.)
Disciplina	344.5104632
Soggetti	Private international law Conflict of laws International law Comparative law Environmental law, International Environmental Law Climatology Environmental economics Private International Law, International and Foreign Law, Comparative Law International Environmental Law Climate Sciences Public International Law Environmental Economics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- What the CDM Is and How It Operates: The CDM in an International Context -- The CDM in China -- Legal Issues for Implementing CDM Projects in China -- The CDM in China in the Post-2012 Era -- A Comparative Study on the Implementation of CDM Projects in India -- Conclusion and Recommendations: How Provide for Better Implementation of the CDM in China?.

Today, climate change is among the most hotly-debated topics. The Clean Development Mechanism (CDM), one of the three financial mechanisms under the Kyoto Protocol open to developing and developed countries, was devised to assist in mitigation of global warming. This book discusses what China should do to make full use of the CDM to promote sustainable development and to meet the challenge of climate change from a legal perspective. The findings lead to the conclusion that the CDM has limitations in promoting sustainable development in China, and thus should be regarded only as a complementary instrument in combating climate change. Legal strategies for improving the implementation of CDM projects under the legal framework in China are thus put forward, and some proposals for China to meet the challenge of climate change in the post-2012 era are made. This book offers new insights to academics and policymakers both in the public and private sector. It is intended for legal practitioners and researchers on carbon trading as well as policymakers interested in the role of developing countries in climate change law. In addition, it is of interest to stakeholders of CDM projects.
