Sommario/riassunto

The EU has limited legislative competence in the field of social law. However, the Member States are increasingly modernizing social services and social (welfare) protection, attempting to make social services more efficient by increasingly looking to the market for the provision of such services. This policy move brings social services into the radar of EU law. The EU response to this sensitive issue has resulted in a piecemeal and fragmented approach towards the treatment of a new policy area of Social Services of General Interest (SSGI) in EU law and policy. This book is a first contribution towards charting how SSGI have emerged as a special category of SGI in the EU, the reaction of the Member States and stake-holders and how policy is being made through new governance processes, carve-outs and safe havens in legislation and soft law, especially in the light of the new values of the EU introduced by the Treaty of Lisbon 2009. It takes an inter-disciplinary approach and will be of interest to lawyers, economists and political scientists who are interested in EU policy-making as well as practioners, EU and national policy-makers.
