

1. Record Nr.	UNINA9910440100703321
Titolo	C37.302-2015 - IEEE Guide for Fault Current Limiter (FCL) Testing of FCLs Rated above 1000 V AC // Switchgear of the IEEE Power and Energy Society
Pubbl/distr/stampa	Piscataway, NJ : , : IEEE, , 2016
ISBN	1-5044-0831-4
Descrizione fisica	1 online resource (64 pages)
Disciplina	621.3192
Soggetti	Electric fault location Voltage regulators - Standards Impedance (Electricity) - Measurement
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The testing of fault current limiters (FCLs) operating on condition-based impedance increase for AC systems 1000 V and above is described in this guide. Constant impedance series reactors and single fuses are not included in this guide.
