**Sommario/riassunto** "This book assembles papers that were produced under a three year collaborative research program on 'China and APEC' undertaken by the Australia Japan Research Centre, in the Asia Pacific School of Economics and Management at The Australian National University and the APEC Policy Research Center, in the Chinese Academy of Social Sciences. ... The work on this project and the papers in the volume provide a base for developing ideas that could be helpful to the policy agenda for APEC 2001"--Preface.

Sommario/riassunto

In this collection, 17 leading scholars based in Solomon Islands, Fiji, Papua New Guinea, Timor-Leste, Australia, New Zealand, the United States and China analyse key dimensions of the changing relationship between China and the Pacific Islands and explore the strategic, economic and diplomatic implications for regional actors. The China Alternative includes chapters on growing great power competition in the region, as well as the response to China's rise by the US and its Western allies and the island countries themselves. Other chapters examine key dimensions of China's Pacific engagement, including Beijing's programs of aid and diplomacy, as well as the massive investments of the Belt and Road Initiative. The impact of China's rivalry for recognition with Taiwan is examined, and several chapters analyse Chinese communities in the Pacific, and their relationships with local societies. The China Alternative provides ample material for informed judgements about the ability of island leaders to maintain their agency in the changing regional order, as well as other issues of significance to the peoples of the region.
