

1. Record Nr.	UNINA9910445560303321
Titolo	1427-2020 - IEEE guide for recommended electrical clearances and insulation levels in air insulated electrical power substations // IEEE
Pubbl/distr/stampa	[Place of publication not identified] : , : IEEE, , 2021
ISBN	1-5044-7297-7
Descrizione fisica	1 online resource
Disciplina	621.31042
Soggetti	Electric cables - Gas insulation Electric substations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This guide, covering three-phase ac systems from 1 kV to 800 kV, provides recommended electrical operating, safety clearances, and insulation levels in air-insulated electric supply substations; addresses insulation coordination procedures; provides design procedures for the selection and coordination of the insulation levels within the station as they relate to substation clearances; and addresses how reduced clearances in high-voltage ac substations will allow for compact bus arrangements and substation voltage uprating applications.
