Nota di bibliografia Includes bibliographical references and index. Nota di contenuto Introduction: the stockperson as a professional: skills, knowledge and status -- Farm animal welfare: assessment, issues and implications --Human-animal interactions and animal productivity and welfare --Attitudes of stockpeople -- Stockperson behaviour and animal behaviour -- A model of stockperson-animal interactions and their implications for livestock -- Changing stockperson attitudes and behaviour -- Conclusion : current and future opportunities to improve human-animal interactions in livestock production. Human-animal interactions have a profound effect on farm animals and Sommario/riassunto stockpeople alike. Training of stockpeople can improve livestock welfare and in turn productivity, and is a principle area of focus after improvements in genetics, nutrition, reproduction, health and housing have been addressed extensively. This volume explores new information on human-livestock relationships, their effects on both animals and handlers and the application of this knowledge particularly in relation to dairy cows, veal calves and poultry. Developments in

knowledge of the relationships and their effects post-far
