Sommario/riassunto	Did Trajan really deserve his reputation as the embodiment of all imperial virtues? Why did Dante, writing in the Middle Ages, place him in the sixth sphere of Heaven among the Just and Temperate rulers? In this, the only biography of Trajan available in English, Julian Bennett rigorously tests the substance of this glorious reputation. Surprisingly, for a Roman emperor, Trajan comes through the test with his

reputation relatively intact.

Sommario/riassunto	The Brassica crops provide the greatest diversity of products derived from a single genus. As vegetables they deliver leaves, flowers, stems and roots that are used either fresh or in processed forms. This book covers the Occidental crops derived from <i>B. oleracea</i> (cole or cabbage group) and Oriental types from <i>B. rapa</i> (Chinese cabbage and its relatives). Both groups are of immense importance for human nutrition, containing vital vitamins and cancer preventing substances.
