Sommario/riassunto

Containing contributions from leading international experts this book explores the life-saving treatment of home parenteral nutrition. It covers the complete scenario of home parenteral nutrition (HPN), from its prevalence in different continents to clinical indications and the practical aspects of its management. Topics covered include the growing use of HPN, theoretical and practical issues associated with HPN in adults and the pediatric population, indications and outcomes in various diseases, complications, nutrient requirements, preparation and administration of the admixtures, monitoring
