Pubbl/distr/stampa	Wallingford, : CABI, c2007
ISBN	1-280-95306-3 9786610953066 1-84593-280-3
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (461 p.)
Disciplina	636.084
Soggetti	Animal nutrition Food preferences Ingestion - Regulation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Previous ed.: 1995.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Preface; Part I: Basics; Part II: Mechanisms; Part III: Theories; Part IV: Food Composition; Part V: Animal and Environmental Factors; References; Index
Sommario/riassunto	The feeding of farm animals directly effects their growth, health, reproduction and ultimately their economic value and is consequently one of the most studied areas of animal science. This work is an examination of developments in the understanding of voluntary food intake and ideas and studies relating to diet selection.
