Sommario/riassunto

This book describes nerve agents and vesicants, their decomposition and their degradation products' chemistry as well as their toxicity including a list of detection techniques of nerve agents and their degradation products. This book will present their history, toxicity, comparison between different sample preparation methods, separation techniques, and detection methods all together in a short, easy to read book, tied together by a single group doing the writing and the editing to assure smooth transition from chapter to chapter, with sufficient Tables and literature references.

Edizione	[1st ed.]
Descrizione fisica	1 online resource (481 p.)
Classificazione	83.67
Disciplina	791.06/8
Soggetti	Amusement parks - History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Translated by Andrew Clarke"--T.p. verso.
Nota di bibliografia	Includes bibliographical references (p. 429-447) and index.
Nota di contenuto	The social origins of the theme park concept -- Development and categorisation -- Globalization of the theme park industry -- A profile of major theme park operators -- Theme parks and the commercialisation of leisure -- The urbanism of theme parks and spatial innovation -- The impact of theme parks -- The development of theme park destinations -- Factors influencing the development process -- Basic principles of theme park planning -- The architectural design of a theme park -- Management strategies.
Sommario/riassunto	From the first pleasure gardens to the global theme park companies, this book provides an understanding of the nature and function of theme parks as spaces of entertainment. It portrays the impacts of theme parks as global competitive actors, agents of global development and cultural symbols, in the context of their role in the developing economy.
