

1. Record Nr.	UNINA9910446347603321
Titolo	Citrus genetics, breeding and biotechnology / / edited by Iqrar Ahmad Khan
Pubbl/distr/stampa	Wallingford, UK ; ; Cambridge, MA, : CABI, c2006
ISBN	1-281-20455-2 9786611204556 1-84593-193-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (384 p.)
Collana	Cabi Publishing
Altri autori (Persone)	KhanIqrar A (Iqrar Ahmad)
Disciplina	634/.3045233
Soggetti	Citrus - Breeding Citrus - Genetics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Contributors; Preface; 1 Citrus Breeding; 2 A Comprehensive Citrus Genetic Improvement Programme; 3 Origin and Taxonomy; 4 Citrus Germplasm Resources; 5 Nucellar Embryony; 6 Cytogenetics; 7 Haploidy; 8 Seedlessness and Ploidy Manipulations; 9 Somaclonal Variation in Sweet Orange; 10 Somatic Hybridization; 11 Microprotoplast-mediated Chromosome Transfer and its Potential for Citrus Breeding; 12 Mapping and Marker-assisted Selection; 13 Cloning and Characterization of Disease Resistance Genes; 14 Genetic Transformation of Citrus for Pathogen Resistance; 15 Genetic Transformation 16 Mutation Breeding 17 Shoot-tip Grafting In vitro; Index;
Sommario/riassunto	Using contributions from international experts, this book provides a comprehensive review of citrus breeding, including relevant genetics, molecular biology and biotechnology. It discusses such topics as the origin and taxonomy, hybridization and seed procedures, and aspects of biotechnology.
