

1. Record Nr.	UNINA9910446348803321
Titolo	Conserving plant genetic diversity in protected areas : population management of crop wild relatives / / edited by Jose Maria Iriondo, Nigel Maxted, Mohammad Ehsan Dulloo
Pubbl/distr/stampa	Wallingford, UK ; ; Cambridge, MA, : CABI Pub., c2008
ISBN	1-281-24439-2 9786611244392 1-84593-371-0
Edizione	[1st ed.]
Descrizione fisica	1 online resource (232 p.)
Altri autori (Persone)	IriondoJose Maria MaxtedNigel DullooMohammad Ehsan
Disciplina	639.9/9
Soggetti	Germplasm resources, Plant Crops - Germplasm resources Germplasm resources conservation Plant diversity conservation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Preface; Contributors; Acknowledgements; 1 Introduction: The Integration of PGR Conservation with Protected Area Management; 2 Genetic Reserve Location and Design; 3 Genetic Reserve Management; 4 Plant Population Monitoring Methodologies for the In Situ Genetic Conservation of CWR; 5 Population and Habitat Recovery Techniques for the In Situ Conservation of Plant Genetic Diversity; 6 Complementing In Situ Conservation with Ex Situ Measures; 7 Final Considerations for the In Situ Conservation of Plant Genetic Diversity; Index
Sommario/riassunto	Conservation in protected areas has focused on preserving biodiversity of ecosystems, whereas conserving the genetic diversity contained within species has historically been ignored. This book presents a set of management guidelines that can be used for the conservation of plant genetic diversity of crop wild relatives in protected areas.
