

1. Record Nr.	UNINA9910447245103321
Autore	Mukhopadhyay Jayanta (College teacher)
Titolo	Approximation of Euclidean metric by digital distances / / Jayanta Mukhopadhyay
Pubbl/distr/stampa	Gateway East, Singapore : , : Springer, , [2020] ©2020
ISBN	981-15-9901-7
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (XX, 144 p. 31 illus., 5 illus. in color.)
Disciplina	514.3
Soggetti	Distance geometry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Geometry, Space and Metrics -- Digital distances: Classes and hierarchies -- Error analysis analytical approaches -- Linear combination of digital distances.
Sommario/riassunto	This book discusses different types of distance functions defined in an n-D integral space for their usefulness in approximating the Euclidean metric. It discusses the properties of these distance functions and presents various kinds of error analysis in approximating Euclidean metrics. It also presents a historical perspective on efforts and motivation for approximating Euclidean metrics by digital distances from the mid-sixties of the previous century. The book also contains an in-depth presentation of recent progress, and new research problems in this area. .
