Sommario/riassunto	What role should a citizen's religious convictions play in her political activities? Is she, for example, permitted to decide on the basis of her religious convictions to support laws that criminalize abortion or discourage homosexual relations? Christopher Eberle is deeply at odds with the dominant orthodoxy among political theorists about the relation of religion and politics. His argument is that a citizen may responsibly ground her political commitments on religious beliefs, even if her only reasons for her political commitments are religious in nature. His ideal of citizenship allows citizens to engage in politics without privatizing their religious commitments, and yet does not

license mindless and intransigent sectarianism. An inherently controversial book that offers a substantial challenge to political liberalism, it will be read by students and professionals in philosophy, political science, law and religious studies, and general readers seeking insight into the relationship between religious commitments and liberal politics.

Sommario/riassunto

Highly praised when published in Germany, *The Quest for the Lost Nation* is a brilliant chronicle of Germany's and Japan's struggles to reclaim a defeated national past. Sebastian Conrad compares the ways German and Japanese scholars revised national history after World War II in the shadows of fascism, surrender, and American occupation. Defeat in 1945 marked the death of the national past in both countries, yet, as Conrad proves, historians did not abandon national perspectives during reconstruction. Quite the opposite—the nation remained hidden at the center of texts as scholars tried to make sense of the past and searched for fragments of the nation they had lost. By situating both countries in the Cold War, Conrad shows that the focus on the nation can be understood only within a transnational context.
