

1. Record Nr.	UNINA9910449743803321
Autore	Lavin Peter
Titolo	Object-oriented PHP [[electronic resource]] : concepts, techniques, and code // Peter Lavin
Pubbl/distr/stampa	San Francisco, : No Starch Press, 2006
ISBN	1-59327-127-1
Edizione	[1st edition]
Descrizione fisica	1 online resource (216 p.)
Disciplina	005.1/17
Soggetti	Object-oriented programming (Computer science) PHP (Computer program language) Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Preliminaries; Contents; Introduction; Chapter 1: What a Tangled Web We Weave; Chapter 2: Basics of Object-Oriented Programming; Chapter 3: Object-Oriented Features New to PHP 5; Chapter 4: Show a Little Class; Chapter 5: Mod UR Class; Chapter 6: The ThumbnailImage Class; Chapter 7: Building the PageNavigator Class; Chapter 8: Using the PageNavigator Class; Chapter 9: Database Classes; Chapter 10: Improvement Through Inheritance; Chapter 11: Advanced Object-Oriented Programming Concepts; Chapter 12: Keeping It Fresh; Chapter 13: More Magic Methods Chapter 14: Creating Documentation Using the Reflection Classes Chapter 15: Extending SQLite; Chapter 16: Using PDO; Appendix A: Setting Up PHP 5; Appendix B: Conversion Table: PHP 4 and PHP 5; Glossary; Index
Sommario/riassunto	Object-Oriented PHP shows developers how to take advantage of the new object-oriented features of PHP. Working from concrete examples, the book begins with code compatible with PHP 4 and 5, and then focuses on object orientation in PHP 5. The author's practical approach uses numerous code examples, which will help developers get up to speed quickly, and show them how to apply what they've learned to everyday situations. All code samples are available for download on the book's companion site.
